

## LONG SHORES AND EXTENSIONS

### LONG SHORE AND EXTENSIONS

The Acme Thread Long Shore System consists of five sizes of extendable Long Shores ranging from 35.5 in (90.2 cm) to 198 in (503 cm) Each Long Shore consists of a 3-1/2 in (8.9 cm) aluminum alloy tube with a 3 in (7.6 cm) aluminum alloy threaded shaft that can be extended manually or activated by air, carbon dioxide or nitrogen. The Acme Thread Long Shore allows soft placement at collapse incidents and can be safely secured with a minimum of shock to the load. All aluminum alloy components of the Long Shore System are hard anodized to reduce electrical conductivity and increase strength and wearability.

**22-796342** Extension 235 24 in (61 cm)  
**22-796356** Extension 435 48 in (122 cm)  
**22-796376** Extension 635 67 in (170 cm)  
**22-796710** Acme Thread Strut MOD 203 24-36 in (61-91 cm)  
**22-796720** Acme Thread Strut MOD 304 35.5-50.3 in (90.2-127.8 cm)  
**22-796730** Acme Thread Strut MOD 406 47.5-73.6 in (120.6-186.9 cm)  
**22-796360** Acme Thread Strut MOD 610 72-116 in (183-295 cm)  
**22-796370** Acme Thread Strut MOD 812 92-147 in (234-373 cm)  
**22-796390** Acme Thread Strut MOD 1016 114-198 in (290-503 cm)  
**22-796258A** Raker Rail 2 24 in (61 cm)  
**22-796258B** Raker Rail 4 48 in (122 cm)  
**22-796258C** Raker Rail 6 72 in (162 cm)  
**22-796258D** Raker Rail 8 96 in (244 cm)
